SEWER DEPOSITS TO BE REFUNDED

SUGGESTION OF MANAGER J. G. CRUMLEY MEETS WITH OFFICIAL SANCTION

The Tonopah Sewer and Drainage company has established a new system which has met with the approval of the Public Utilities commission and which promises to establish a precedent for every similar corporation in Nevada.

Hereafter, the management of the Sewer company is allowed to discriminate in compelling patrons to make a deposit on filing application to have sewer connections with their homes or places of business. With the object of simplifying bookkeeping and rendering the use of the system more popular Mr. J. G. Crumley, the manager, wrote the commission at Carson City asking authority to waive the deposit.

The suggestion met with the hearty approval of the board which simply returned the letter to Mr. Crumley with an official endorsement conferring the desired license to treat customers in the same way as merchants treat their patrons, that is, to the extent of refusing or extending credit.

Under the new rule effective April 1, 1916, the company is allowed to cause customers to establish their credit before delivery of service. The applicant's credit shall be deemed established if he or she owns the premises; makes a cash deposit as heretofore; furnishes a guarantor or has paid the regular bills for service for twelve months prior to the first of April. After the twelve month period, if the user fails to pay his bills, the company is at liberty to demand the payment of the regular deposit. In no case will service be discontinued until after fifteen days written notice.

ANOTHER GROUP OF CLAIMS IS TURNED

DAUBE & CO. PURCHASE FOR CASH THE SILVER QUEEN IN WEST DISTRICT

O. A. Daube & company of New York City, who are presumably representing what is known as the Schwab interests, and who have already turned several groups in the western portion of the district, yesterday closed a deal for the Silver Queen group. It consists of five claims owned by Augustus Haskell and Charles Steele.

The former owners report that the deal was for a cash consideration, but the amount was not given out. It will be remembered that this group was sold some years ago for \$17,000, but the purchasers permitted their rights to lapse and the people who sold to Daube & Co. relocated a year ago. Only surface work has been done. The property adjoins the Table Mountain, Comstock and Bonanza groups. Mr. Daube will arrive from New York some time during this month and then it is probable that definite information will be given out as to the work planned by the company to be organized.

Orray lodge had among its members some of the best known mining engineers in the United States including the late Thomas F. Walsh, owner of the Camp Bird mine, which was sold in London for something like \$7,000,000. W. B. Alexander, former secretary of the Montana Tonopah, also was a member of Orray lodge.

GERMANS CLEAR DUTCH BORDER

BARB-WIRE FENCE MARKS THE SAFETY FIRST DEAD LINE

(By Associated Press.)
BERGEN-OP-ZOOM, Netherlands, Apr. 6.—Several recent indications point to the fact that the Germans in Belgium intend to entirely clear the region immediately next to the frontier of its inhabitants, with a view, presumably, to further facilitating their strict control of the Dutch boundary. They have already evacuated the strip of country situated between their two barbed-wire fences in a part of Flanders, and the arrival here of many refugees from the Belgian village of Putte (situated just north of Antwerp), strengthens the view generally held in the frontier districts that the people who have so far stuck to their home in the rest of this zone will, in due course, suffer the same fate.

The latest lot of fugitives, men, women and children, fled through the barbed-wire entanglement of the first German barrier in order to escape the ever bitterer want reigning in their village. It was a sad sight, these penniless and homeless people who arrived in the market square in their wagons, there to apply to the Dutch police for a temporary shelter and for a ticket enabling them to proceed to one of the Belgian refugee camps in this country. The immediate reason for their expatriation was that for a fortnight past the Germans have refused to allow any further food to be brought to this region prisoned between their two formidable barbed-wire fences, while from the Dutch side practically nothing could reach the villagers.
